MARKET REPORT

Dollar extends slide

The dollar fell to its weakest level in three months as investors scaled back expectations for further Federal Reserve interest-rate increases following a run of softer US economic data.

The Bloomberg Dollar Spot Index dropped for a third day and hit its lowest since May 15. That came as traders cut the chance of a Fed hike next month to just one-in-three, down from about 75% in late July.

HEADLINE CPI: The CPI calculates the cost to purchase a fixed basket of goods as a way of determining how much inflation is occurring in the broad economy. The CPI uses a base year and indexes current year prices based on the base year's values.

CORE CPI: The headline figure is not adjusted for seasonality or for the often volatile elements of food and energy prices, which are removed in the Core CPI.
